Le soglie GUTMANN soddisfano i requisiti predisposti dalla normativa DIN 18040 1 + 2, relativa alle costruzioni senza barriere architettoniche. Resistono all'acqua per livelli superiori a 1350 Pa, certificato IFT, con una guarnizione in gomma cellulare nella sezione della soglia.

GUTMANN thresholds are suitable for barrier-free building by DIN 18040 part 1 + 2.
Fulfilled highest watertightness up to 1350 Pa, IFT-certicated, with a cellular rubber gasket in the section of the threshold.

CARATTERISTICHE

FEATURES

Riduzione del punto di rugiada o della formazione della condensa attraverso un'ottima gestione isoterma.

Punti di fissaggio nascosti nella finestra con l'applicazione di una piattina di supporto.

Controlavorazione predisposta attraverso l'applicazione di tappi di testa.

Elementi di protezione intercambiabili e disponibili in alluminio e in plastica.

Materiali plastici privi di PVC.

Reduction of dew point performance or condensate formation via an optimal isothermal run.

Concealed screwing on the frame via application of the threshold support.

Counter-milling dispensed by using the filler pieces.

Exchangeable step protection optional plastic or aluminium.

Used plastic is PVC free.
